

# Perpendicular Parking

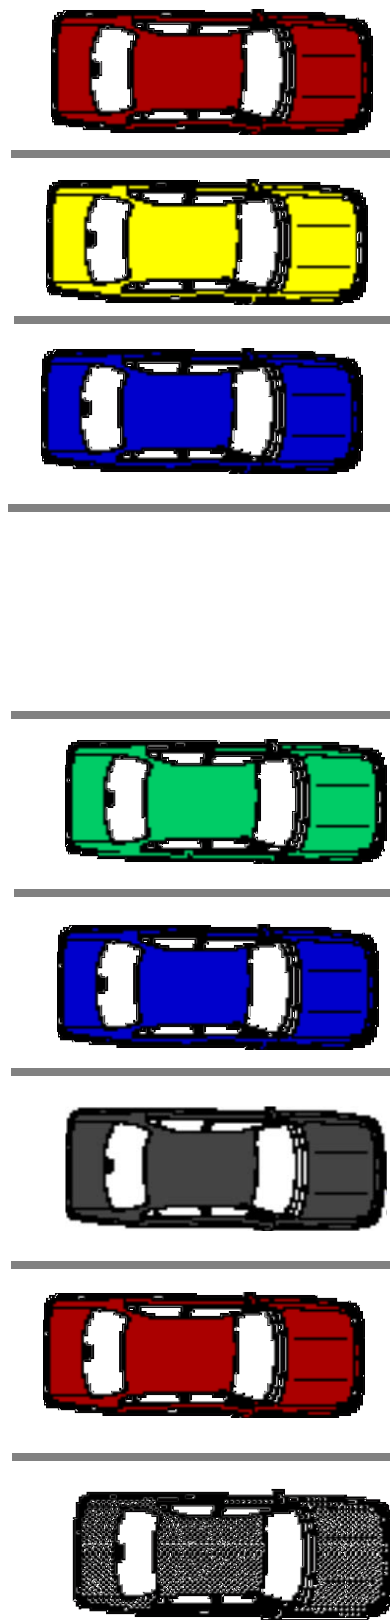

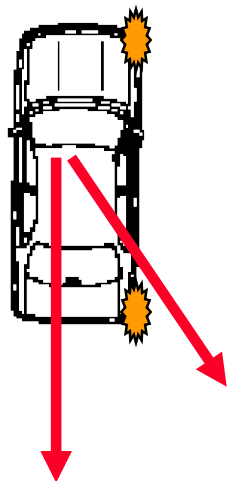

# Approach

**Identify a  
safe &  
legal  
parking  
space.**

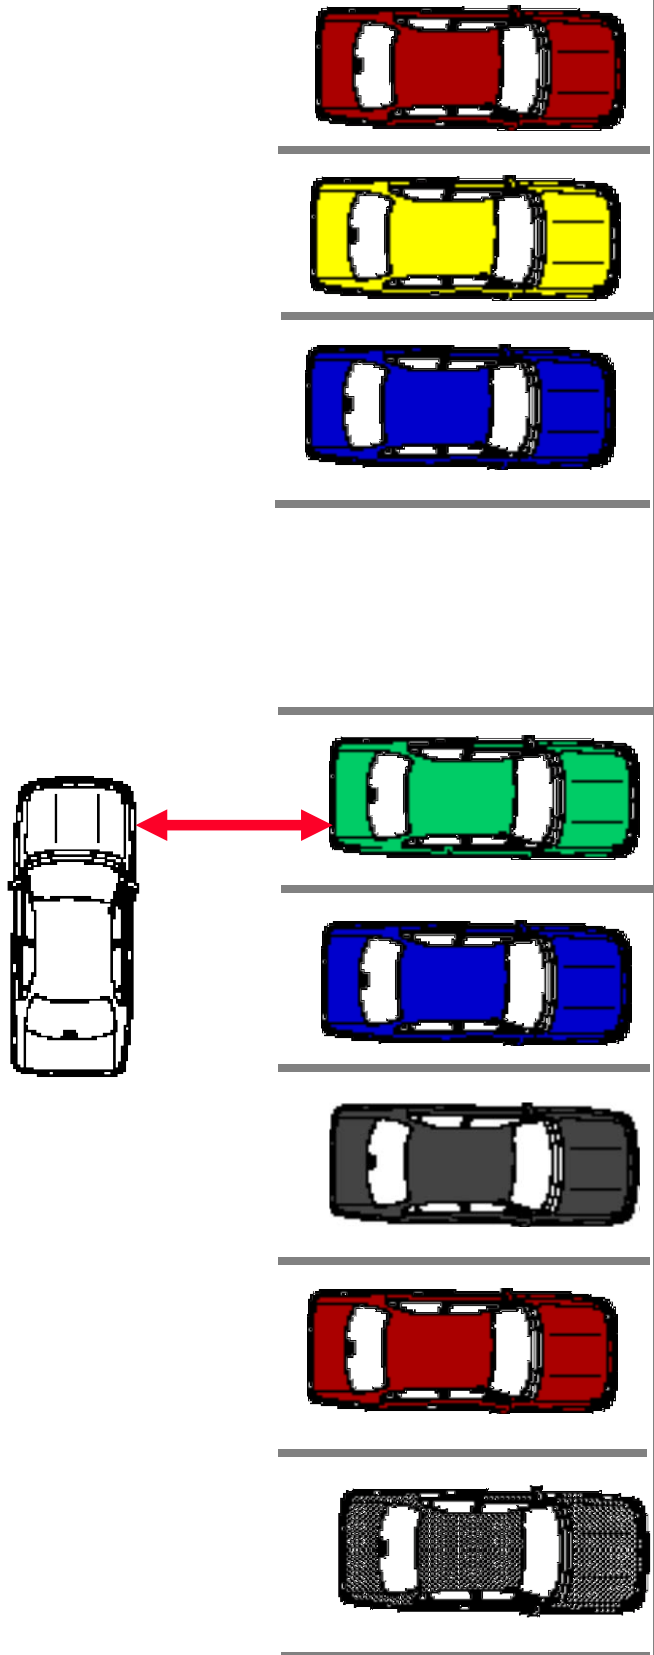

# Prepare to Stop

- Scan rearview mirrors & check right blindspot.
- Signal right

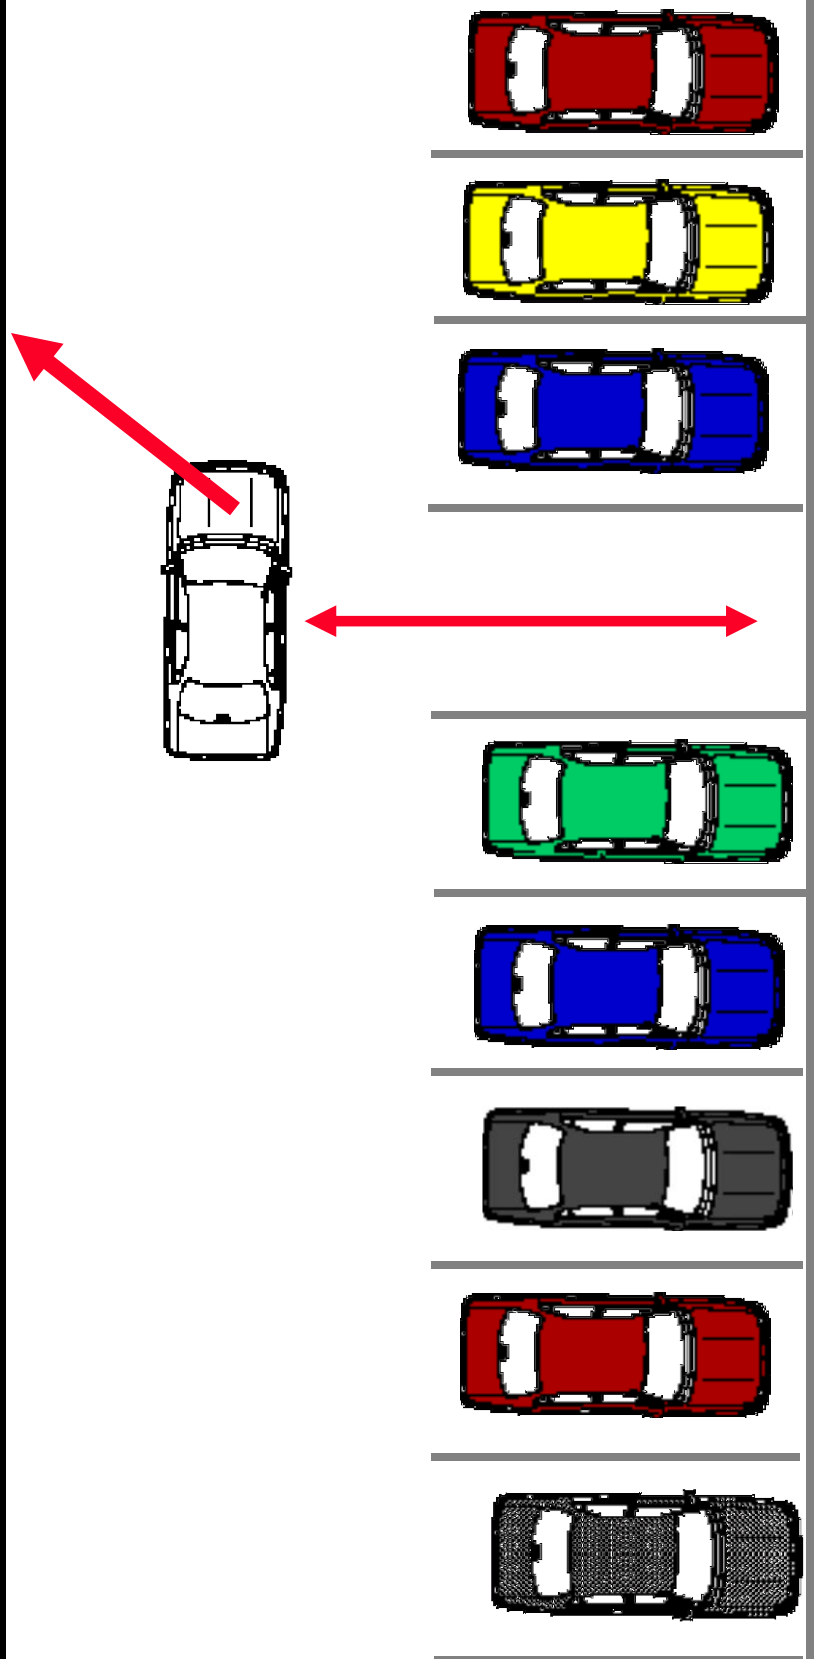

# Lane Position

- Stay about 3 feet from the parked vehicles

# Lane Position

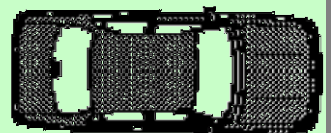

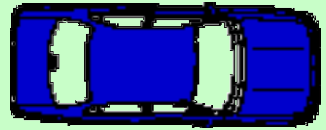

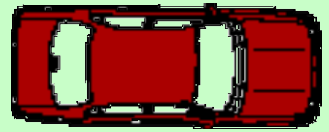

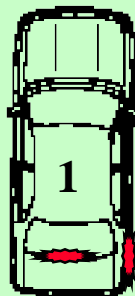

- Reference point:**
- Half way through space
  - Steer sharply left to a 45 degree angle
  - Stop

# Perpendicular Parking

•Communication:

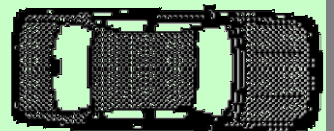

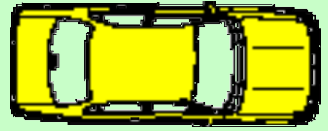

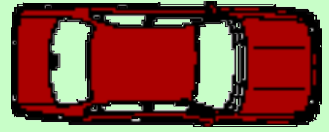

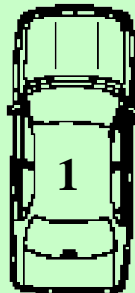

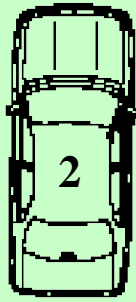

**Signal right  
and flash  
brake lights.**

# Perpendicular Parking

- **Target Areas:**

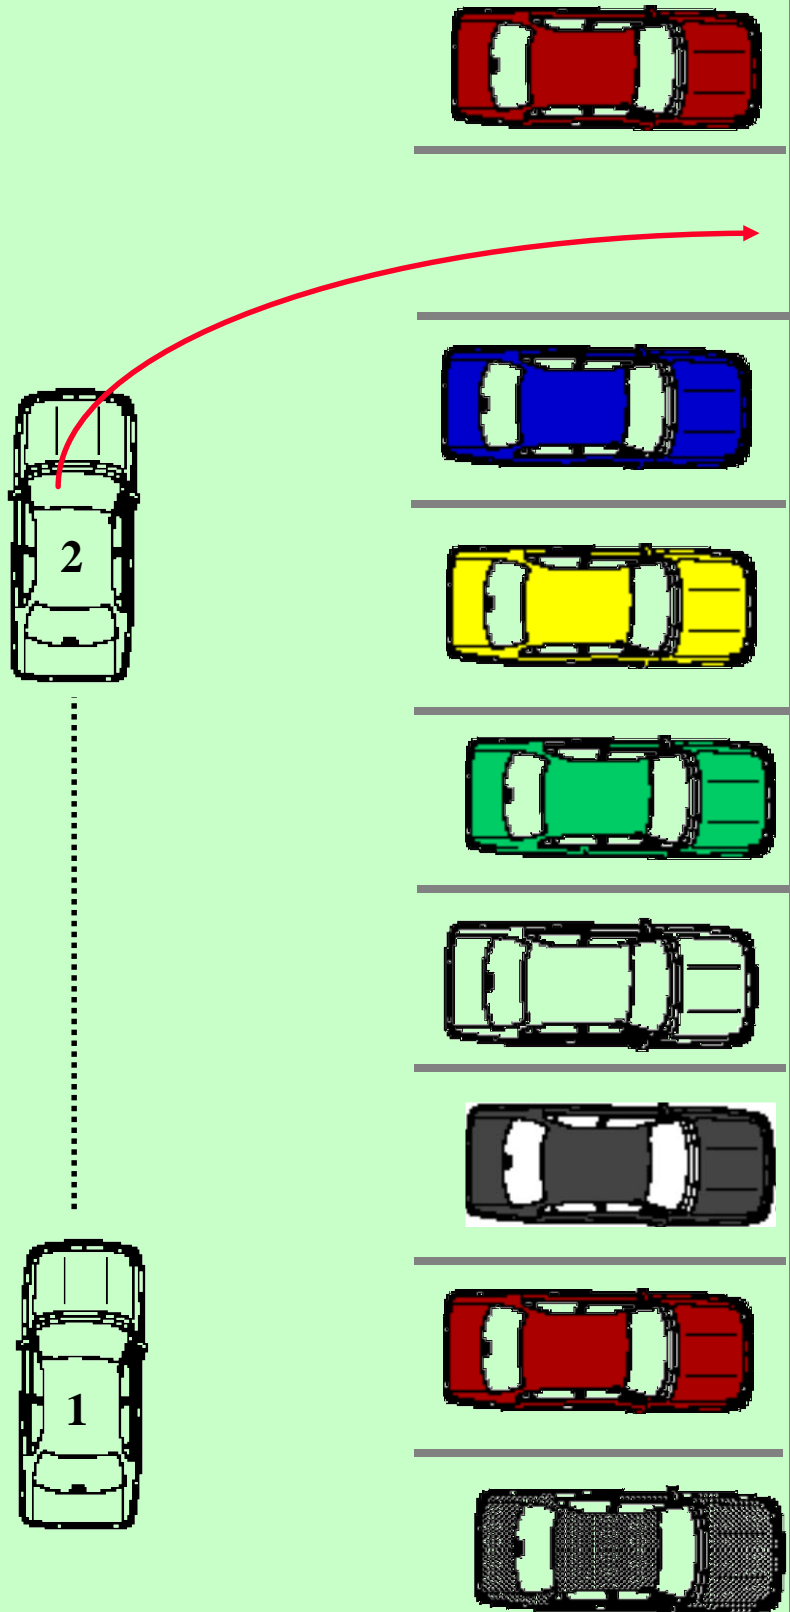

Identify center  
of parking  
space.

# Perpendicular Parking

- **Sightlines:**

Is your  
path of travel  
open or closed.

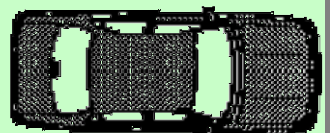

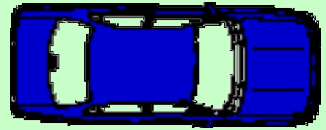

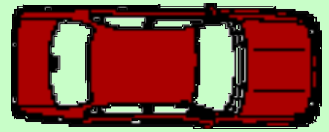

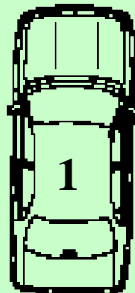

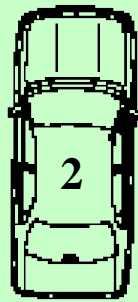

# Perpendicular Parking

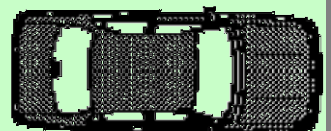

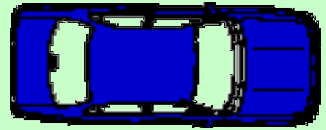

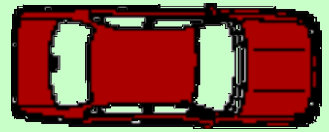

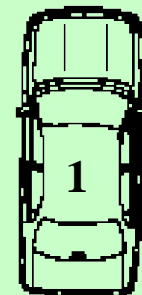

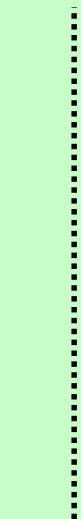

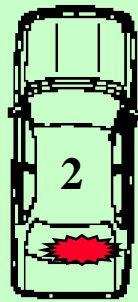

- References:

Identify the proper position for your turn.

# Perpendicular Parking

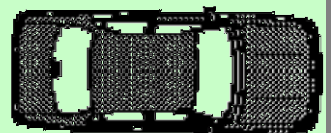

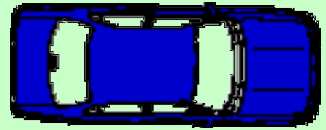

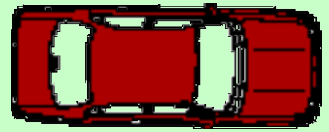

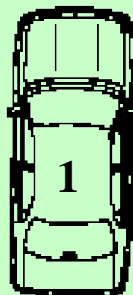

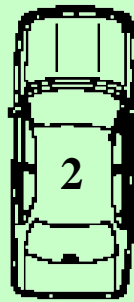

- Speed control:**  
Brake as needed  
to enter space.

# Perpendicular Parking

- **Lane position:**

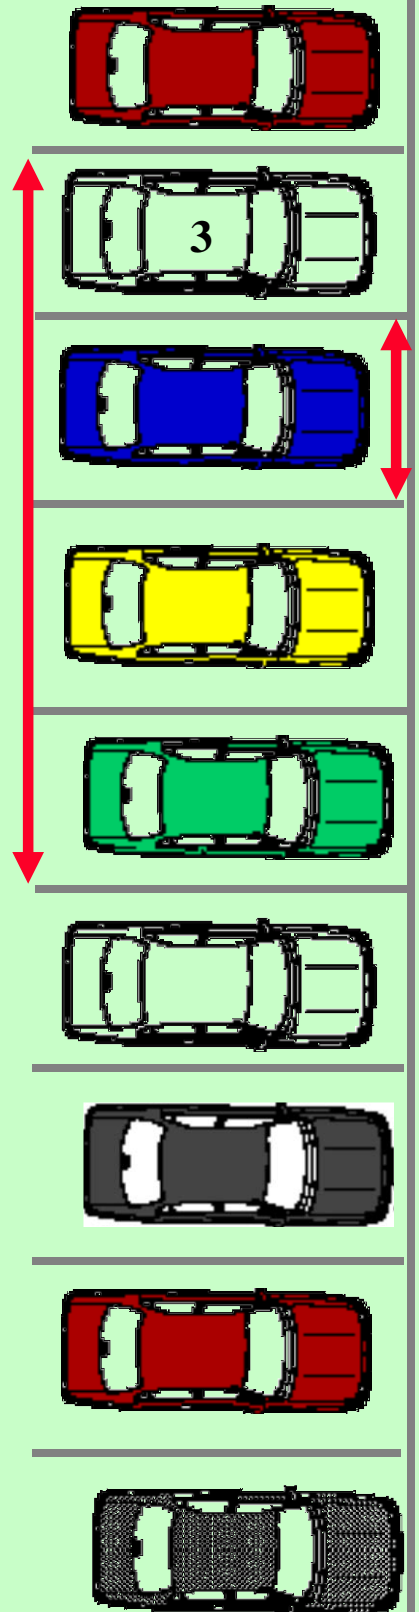

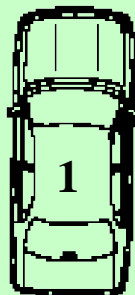

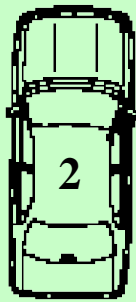

Select lane position 2.

# Perpendicular Parking

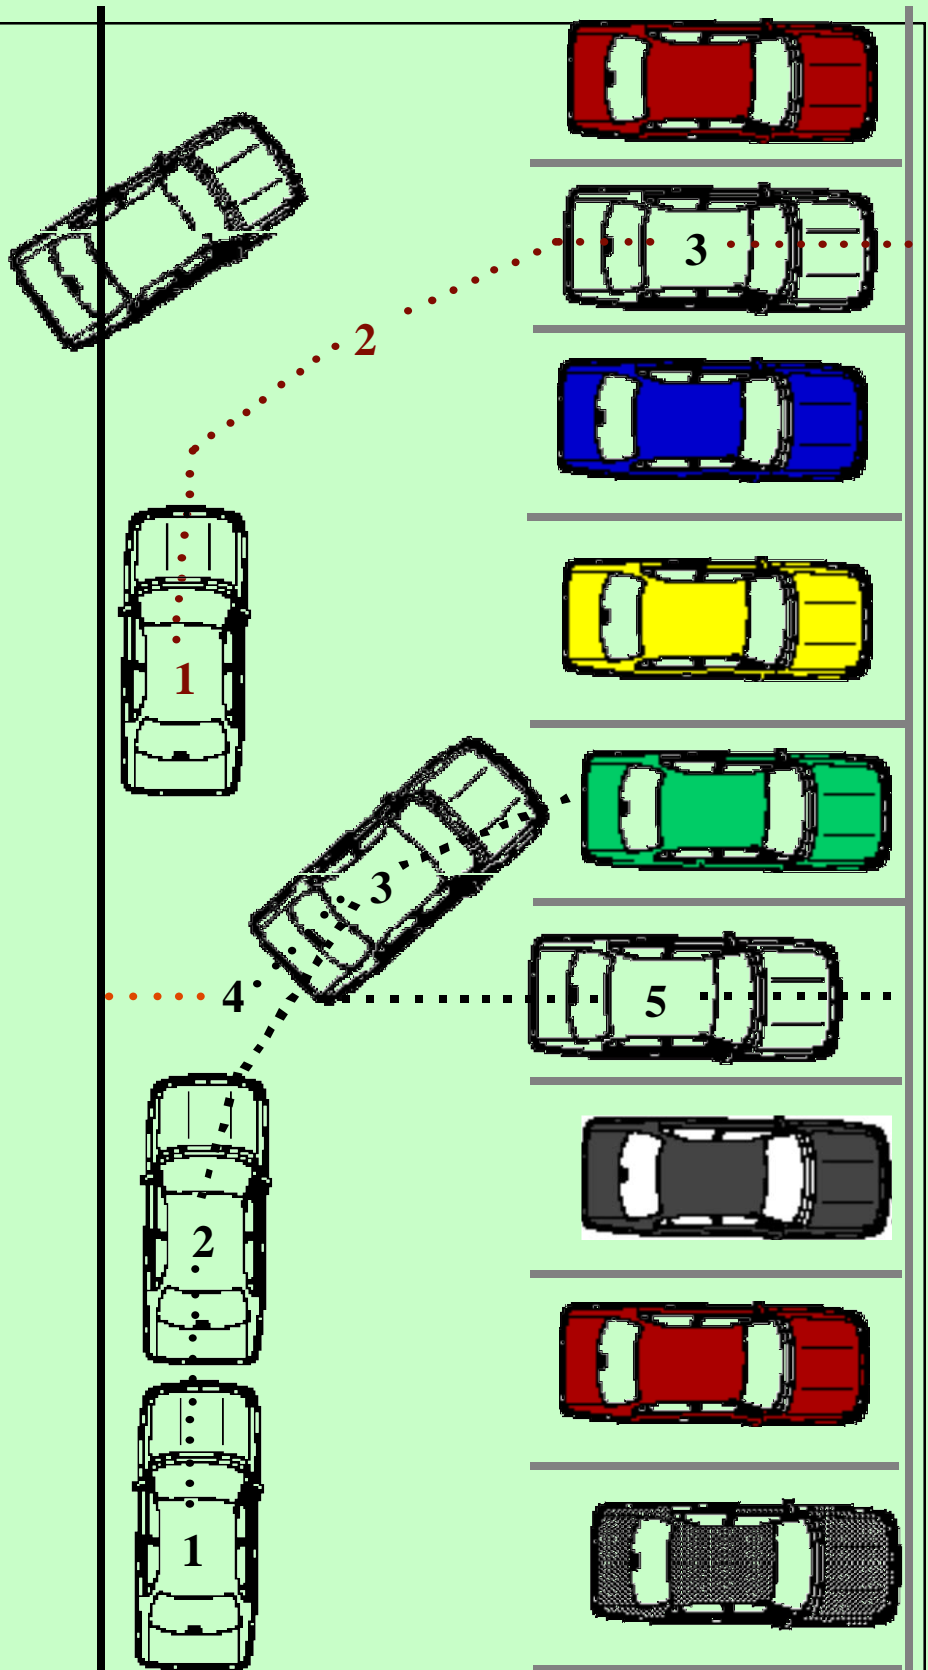

- **Courtesy considerations:**

Centered in space and clear of isle.

## Alternate method

- If you do not have space to turn directly into your space, target the space beyond your space (ie. green car) and then back up. Now you will be headed directly into your space.
