

Approach
&
Inside Checks

Inside Checks

- Approach
- Doors
- Key
- Adjust seat
- Adjust mirrors
- Fasten seatbelts
- Locate controls
- Demonstrate hand signals

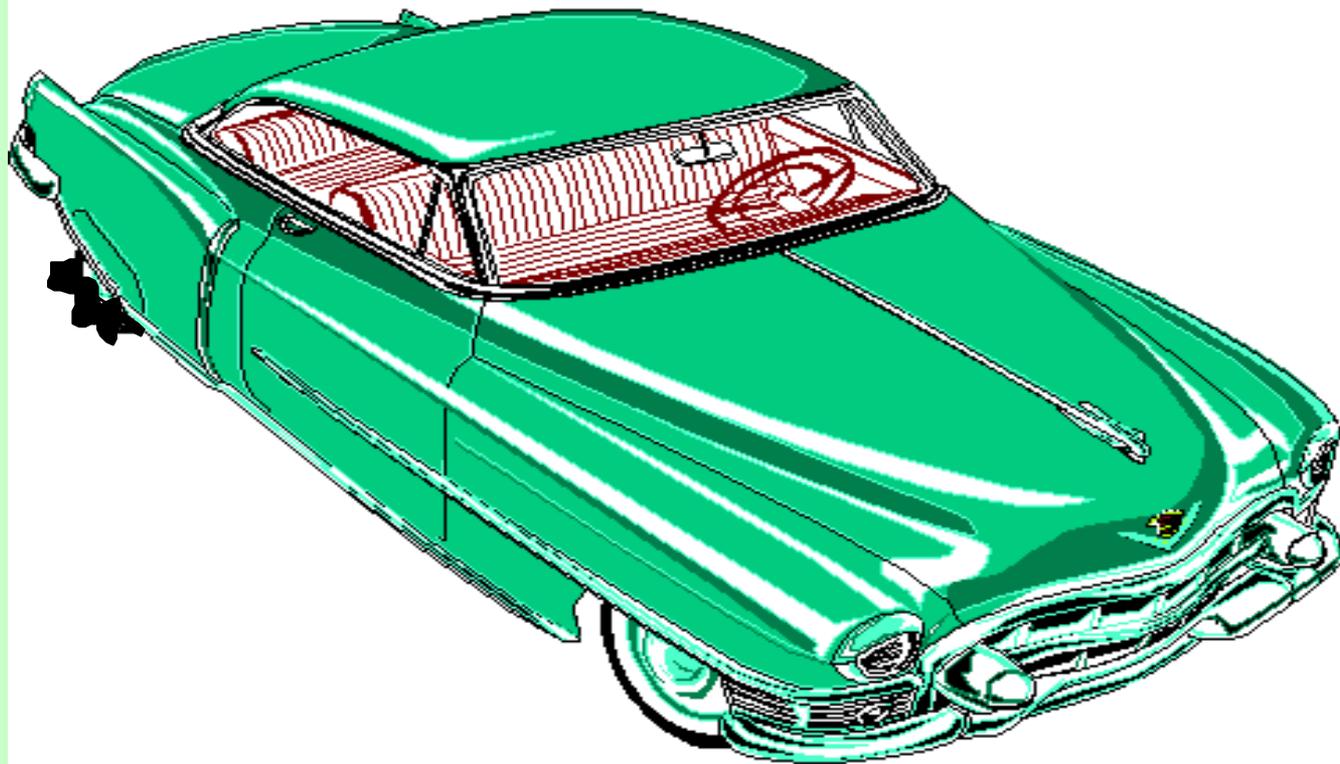

Approach the car

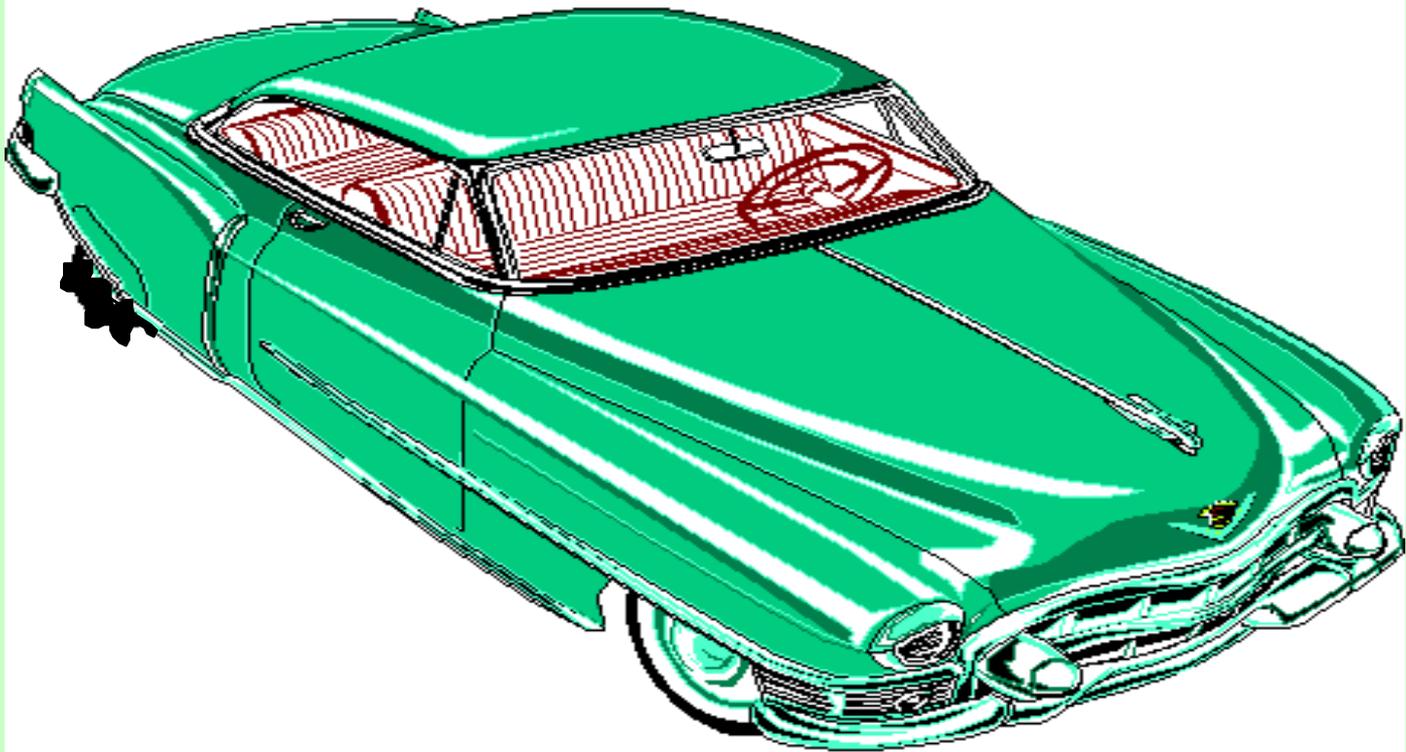

- Check the tires.
- Check for anything under the vehicle or near the tires.
- Check for posts or other obstacles near the car.
- Check for any damage or obvious fluid leaks.

What should you identify?

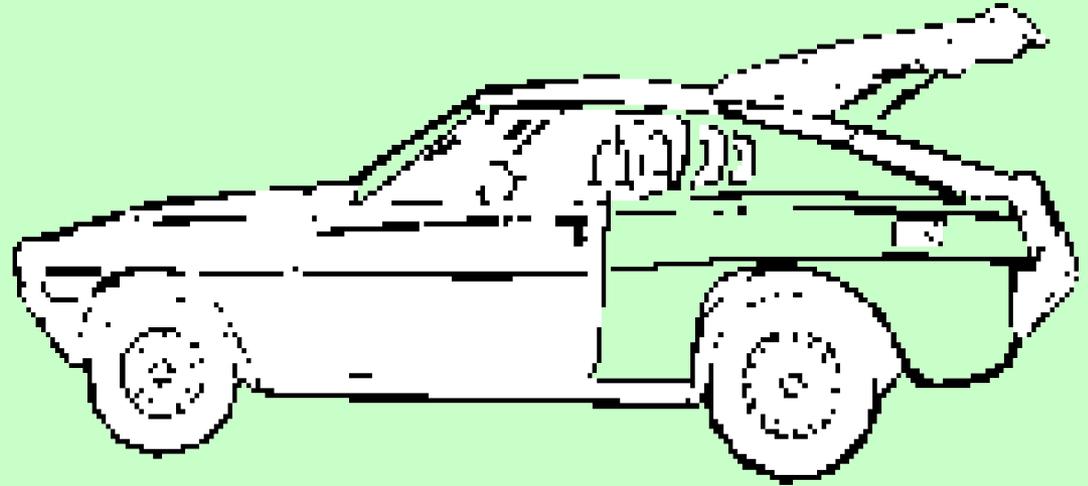

The rear tire is flat!

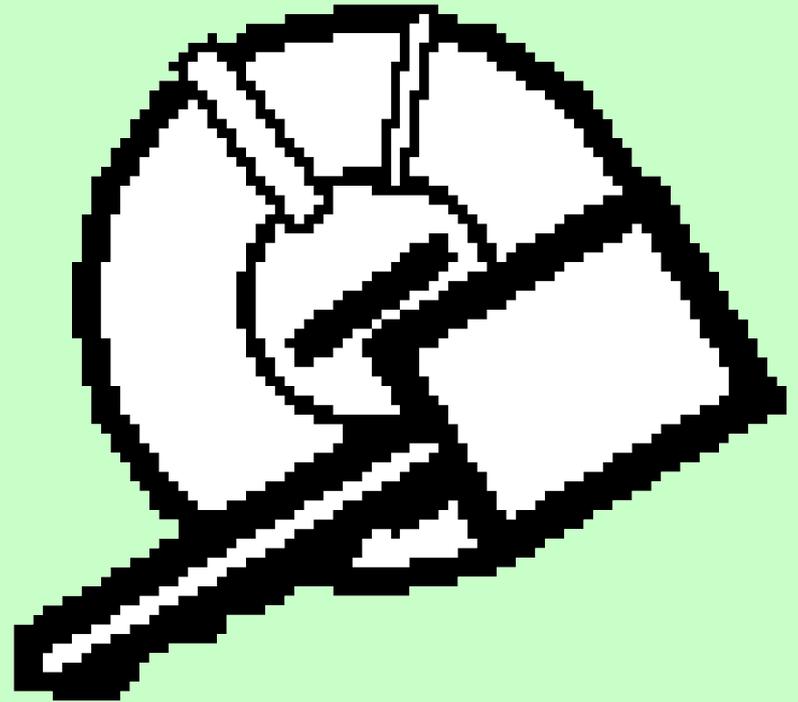

Door

- Store your belongings in the trunk.
- Get in the car.
- Lock your door.
- Driver check to make sure that all doors are locked.

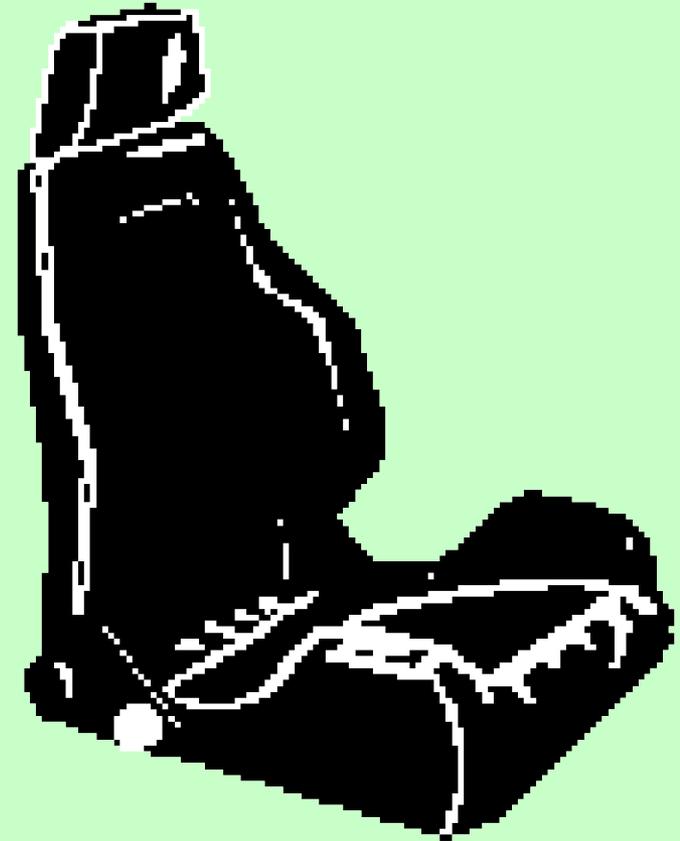

Key

- Ask your instructor for the key.
- Insert the key in the ignition, but do not start the engine.

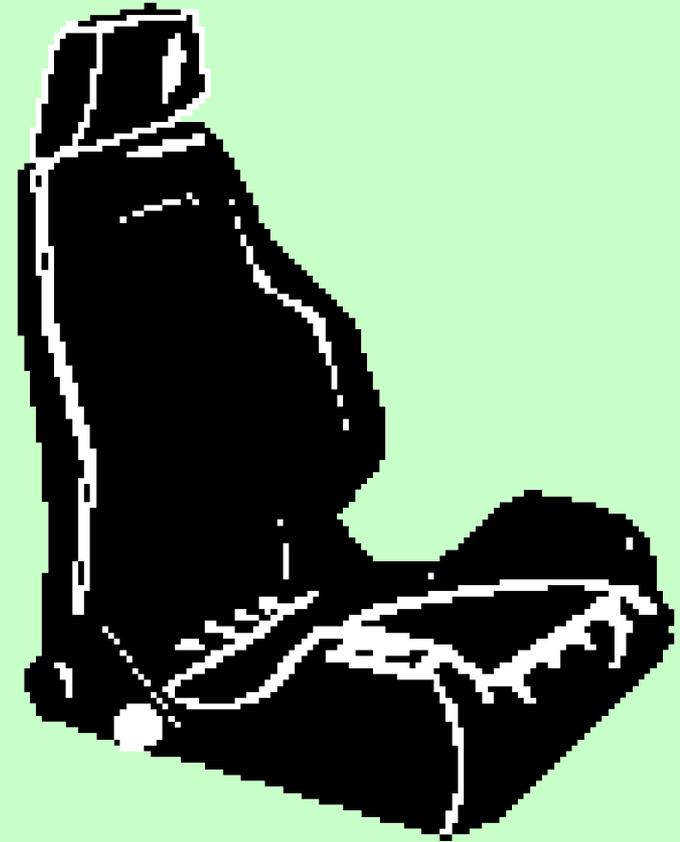

Adjust seat

- Move the seat with the lever under the front of the seat.
- Make sure you are at least 10 inches from the steering wheel.
- Adjust the seat back with the lever to the left of the seat.

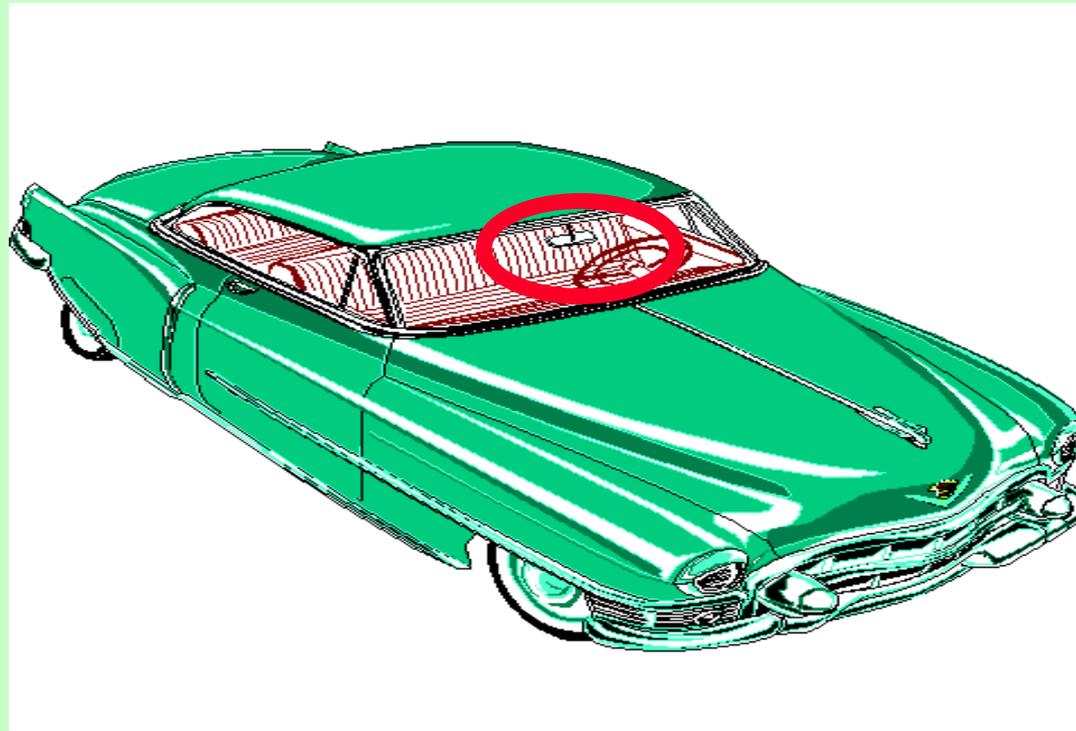

Adjust seat

- Adjust the head restraint directly behind your head.

Adjust mirrors

- Adjust the inside mirror - center it on the rear window.

Adjust mirrors

- Adjust the left outside mirror -
Move your head close to the window and just barely see the side of your car. Most have an inside adjustment lever.

Seatbelts

- Buckle your seatbelt
 - low and tight
- Make sure the shoulder belt goes over your shoulder
- Make sure everyone is buckled up

Locate controls & devices

Demonstrate Hand Signals

- Left hand signal
- Right hand signal
- Slow down or stop hand signal
