

# Using Your Cell Phone Safely

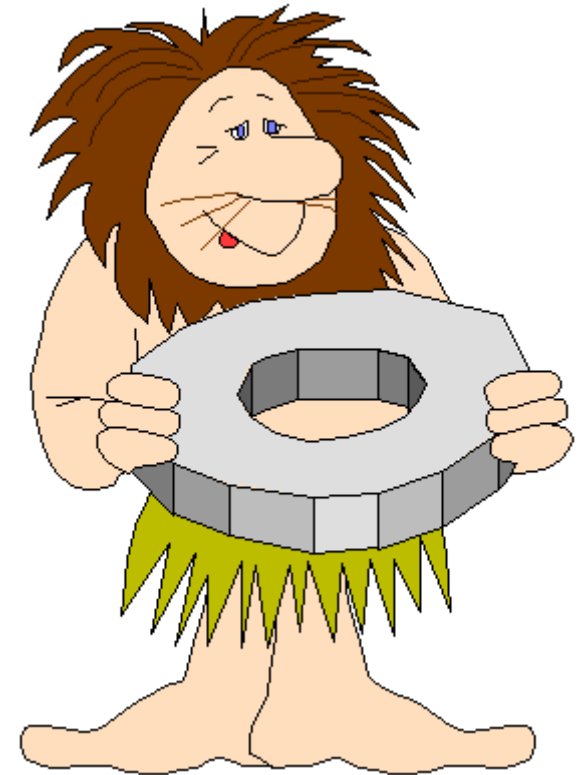

**Safe driving is a serious responsibility. Once behind the wheel, you are in control of a 2000-3000 pound vehicle. Once you take control, driving safely and defensively is your main goal.**

**Safe operation of your vehicle  
requires caution, common  
sense and awareness of the  
task at hand.**

**Cellular phones  
are not toys.  
They are a  
marvelous tool to  
help enhance  
both your  
personal safety  
and the safety of  
others.**

**When using a cellular phone,  
think about safe operation in  
terms of three things:**

- **Concentration**
- **Emotion**
- **Location**

**Cellular phones  
should not be  
used in the same  
carefree manner  
we all use our  
regular land line  
phones.**
